From The Boston Herald.

The argument put forth by these in this country who are advocates of the imperialist theory is that we owe it to ourselves to give to the natives of the Philippine Islands the benefits of a free American government. But the Flilpinos refer our professionary and if we insist upon their accepting them, will undoubtedly do their best to forcibly reject them. What is more, they accuse us of hypocrisy of seeking to despoil them of their independence and rights of possession, while prefending that we are actuated only by the highest and noblest of motives, and are acting, not for our own, but for their good.
